Environment at Balmaha

Environmental advisors have been engaged on the project (ESD and SW) and will consult for the duration of the project.

An ecological survey was undertaken in October 2022 providing recommendations including undertaking a further bat survey prior to the commencement of construction activities.

Best practice construction methods will minimise potential disturbance to habitats and fauna.

The report also noted areas of Invasive Non-native species of vegetation as shown on the drawing below.

These will be managed where required by specialist contractors during the construction works.
