Taking care of your environment

Welcome to our information event

We are taking care of the waste water services in your community by upgrading our network to help alleviate sewer flooding.

The project involved the formation of an underground offline storage tank and related underground works, manholes and hatches that are required to alleviate flooding in the Braidholm Road area.

The objectives of today's event are:

- To provide information on our plans
- To discuss how we can manage the impact of construction work
- To answer your questions and discuss any concerns

We have information on:

- Where work will take place
- What the proposed investment means for you
- What happens next and how you can keep in touch
