

**Scottish
Water**

Trusted to serve Scotland

YOUR CHARGES EXPLAINED

HOUSEHOLD
METERED CHARGES
2022/2023

We deliver **1.53 billion** litres of clear, fresh drinking water every day so it's there whenever you turn on the taps.

We protect the environment by removing and treating **1.08 billion** litres of waste water every day.

Our vital public services help more than **5 million** customers and over **2.6 million** households across Scotland go about their day-to-day lives.

Drinking water quality remains at its highest ever level - we carry out, on average, **1 quality test every 2 minutes**[†] on the water we supply to your taps.

Our focus is on delivering an excellent service, providing great value for money, and reducing the effect we have on the environment. We work 24 hours a day, 365 days a year to keep the water cycle running.

The charges you pay allow us to operate and improve water and waste water services in communities across Scotland.

Your metered charges

One of our key aims at Scottish Water is to make charges reflect, as closely as possible, the cost of the services we provide to our customers. When we send out your invoice it will consist of the following elements, depending on which Scottish Water services you have:

- a) Annual Fixed Charges**
- b) Volumetric Charges**
- c) Property Drainage Charges**

The charges detailed in this leaflet apply from 1 April 2022 until 31 March 2023 and relate to the average household metered customer, who typically has a 15mm or 20mm water meter installed.

If your water meter is bigger than 20mm different charges will apply. Please call our Customer Helpline on **0800 0778778** for more information on these specific meter charges.

a) Annual Fixed Charges

To get water to your home and remove the waste water, we operate a huge network of more than 60,000 miles of water pipes and sewers, and more than 2,000 water and waste water treatment works. The cost of operating and improving these is largely fixed – they're the same if you use one glass of water a day or 100; if you flush a toilet once or a dozen times a day. The fixed charges are based on the size of the meter serving your house or property.

Annual Fixed Charges	Water £/meter	Waste Water £/meter
Meter size up to 20mm	£166.23	£170.72

Please note: If there is any water used for business purposes or the property has a swimming pool then the fixed charges will be based on the actual size of the water meter serving the property. For information on charges for larger meters please call our Customer Helpline on **0800 0778778**.

b) Volumetric Charges

We charge you for each cubic metre ($1\text{m}^3=1,000$ litres) of water you use. Since not all the water you will use will come back to our sewer, your waste water volume is assumed to be 95% of your water volume. If you think that significantly less than 95% of the water that you use ends up in the public sewer, call our Customer Helpline on **0800 0778778** and we will arrange to discuss the situation with you.

For customers supplied through either a 15mm or 20mm meter two volumetric rates will apply to the volumes of both the water and the waste water that you use.

One rate will apply to the first 25m^3 of water that you use in the financial year. While a second, lower, rate applies to all volumes over 25m^3 of water. This structure is then repeated for waste water charges.

These charges are based on the volume of water recorded by the water meter serving your home.

Volumetric Water Charges	£/m ³
for the first 25m^3	2.6101
for volumes after first 25m^3	0.9457

Volumetric Waste Water Charges	£/m ³
for the first 23.75m^3	3.3748
for volumes after first 23.75m^3	1.5959

c) Property Drainage Charges

Around a third of the water in the public waste water system is rainwater that drains from private properties and public areas such as roads and pavements.

Property Drainage is the term that is used for the service of dealing with rainwater drainage from within the boundary of a property, such as roofs, private car parks and private roads that drain to Scottish Water sewers.

If rainwater drains to the public sewer from your property, then Property Drainage Charges will apply. Where Scottish Water deals with no Property Drainage from any part of the property, no Property Drainage Charge will be applied.

The simplest way we have of reflecting the cost of this part of our service is through charges linked to the Council Tax Band for your property.

Council Tax Band	Property Drainage
Band A	£68.52
Band B	£79.94
Band C	£91.36
Band D	£102.78
Band E	£125.62
Band F	£148.46
Band G	£171.30
Band H	£205.56

Help us to help you

Water is a precious natural resource and we must all look after it. When nature calls, there's a world to save - so **join the wave**:

- Only flush the 3Ps - toilet **p**aper, **p**ee & **p**oo.
- Don't flush single-use wipes, period products or other bathroom waste items as these can contain plastic. Put them in the bin instead.
- Recycle or put all cooled fat, oil and grease in a bin, not down the sink^.
- Top up from the tap - use a refillable bottle and enjoy great-tasting water from the tap. It's good for you, your pocket and the planet.
- Water is always worth saving - there are lots of simple ways to save water that can help keep your energy costs down. Find out how much water you use in your household, visit: **www.getwaterfit.co.uk**

To find out more, visit **www.scottishwater.co.uk**

^ Please check with your local Council/waste contractor for info on how to recycle or dispose of used fat, oil and grease in your area.

Stay in the know
